**PLEASE CALL BEFORE YOU DIG**

**Call DIG-TESS @ 811 OR 1-800-DIG-TESS  
two (2) days prior to excavation.**

## Reducing Fats, Oils and Grease in Your Community

### DO!

#### *Special points of interest:*

- Reducing Grease!
- Household Cleanup Event!
- Call DIGTESS before Digging
- KMUD offers other services
- Adopt-A-Barrel

- Put oil and grease in covered collection containers.
- Scrape foods from dishes into trash cans and garbage bags and dispose of properly. Avoid using your garbage disposal.
- Remove oil and greases from dishes, pans, fryers, and griddles. Cool first before you skim, scrape, or wipe off excess grease.
- Prewash dishes and pans with cold water before putting them in the dishwasher.
- Cover kitchen sink with catch basket and empty into garbage can as needed.
- Cover floor drain with fine screen and empty into garbage can as needed (food service).
- Mix liquid vegetable fats with an absorbent material such as cat litter or coffee grounds in a sealable container before throwing in the trash.

### DON'T!

- **DON'T** pour oil and grease down the drain.
- **DON'T** put food scraps down the drain.
- **DON'T** run water over dishes, pans, fryers, and griddles to wash oil and grease down the drain.
- **DON'T** rinse off oil and grease with hot water.

## **GREASE IS THE LEADING CAUSE OF SEWER OVERFLOWS!**

Kingsland Municipal Utility District has a core mission to protect public health and the environment so that wastewater can be delivered to our treatment plant, cleaned up and then released back into our local waterways.

Over time FOG (fats, oils & kitchen grease) that are poured down the sink or garbage disposal will enter the sewer system and clog pipes as the grease hardens. These pipe blockages can send wastewater backwards and out of manholes—onto our streets and into our waterways—or they can lead to plumbing backups on private property.

FOG comes from meat fats in food scraps, cooking oil, shortening, lard, butter and margarine, gravy, and good products such as mayonnaise, salad dressings, and sour cream.

Our challenging goal is to reduce sewer spills to zero through system maintenance and education. But grease is the number one cause of sewer spills and we won't eliminate spills unless we keep grease out of our drains in the first place.

**COMPOST, & MULCH**

**Hours of Operation:**  
**Monday through Friday**  
**(excluding holidays)**  
**8:00 AM to 3:30 PM**

Mulch is free

Compost (dillo dirt) is \$10/bobcat bucket (1/2 cubic yard)

**Monday—Friday**

KMUD is a Municipal Utility District (MUD) form of government that was created on December 27, 1972, under the authority, conditions, and restrictions of Article XVI, Section 59, of the Texas Constitution. Kingsland MUD was created to provide sewer services for communities within the District’s boundaries. Five Board members are elected to provide oversight of a District’s business. KMUD currently provides: sewer collection and treatment, septic system materials treatment, brush grinding, compost, and recycling services. A MUD has the authority to levy rates and taxes to construct, purchase and operate facilities for the District’s legally defined services. Other functions MUD’s can provide include: water, wastewater, storm-water control, garbage collection, road maintenance, parks, fire protection and police services if authorized by the District’s voters.
