**PLEASE CALL BEFORE YOU DIG**

**Call DIG-TESS @ 811 OR 1-800-DIG-TESS  
two (2) days prior to excavation.**

## Kingsland Municipal Utility District Mission Statement

Mission of the Kingsland Municipal Utility District (KMUD) is to provide the Kingsland area communities with the safe collection, transportation, process control and legal disposal of all domestic, industrial or communal wastewater while operating at the lowest reasonable cost and in a service oriented, forward looking and financially responsible manner.

KMUD will also serve a leading role in improving the quality of life; safeguarding public health and further economic development of our community. The District will provide services to meet such other needs that may arise in the community as authorized under state law.

- Reducing Grease!
- Household Cleanup Event Recap
- Call DIGTESS before Digging
- BAGGED COMPOST!

## GREASE IS A MENACE TO THE SEWER LINES!

Over time FOG (fats, oils & kitchen grease) that are poured down the sink or garbage disposal will enter the sewer system and clog pipes as the grease hardens. These pipe blockages can send wastewater backwards and out of manholes—onto our streets and into our waterways—or they can lead to plumbing backups on private property.

### **AS A REMINDER:**

- WIPE** or scrape your dishes before washing.
- REMOVE** grease or oil from your pans with a paper towel before washing.
- DISPOSE** of food scraps in the trash, and minimize garbage grinder usage.
- NEVER** pour grease or oil down the drain.

- Use environmentally safe cleaning products instead of harsh detergents or cleaners that can damage sewer lines.
- If you generate large amounts of used cooking oil, reuse or recycle it. (As a reminder Kingsland MUD accepts used cooking oil).
- Put oil and grease in covered collection containers.

**Monday—Friday**

KMUD is a Municipal Utility District (MUD) form of government that was created on December 27, 1972, under the authority, conditions, and restrictions of Article XVI, Section 59, of the Texas Constitution. Kingsland MUD was created to provide sewer services for communities within the District’s boundaries. Five Board members are elected to provide oversight of a District’s business. KMUD currently provides: sewer collection and treatment, septic system materials treatment, brush grinding, compost, and recycling services. A MUD has the authority to levy rates and taxes to construct, purchase and operate facilities for the District’s legally defined services. Other functions MUD’s can provide include: water, wastewater, storm-water control, garbage collection, road maintenance, parks, fire protection and police services if authorized by the District’s voters.
